

# New UFO mystery

*Bob*

THE mystery of the strange circles which keep appearing in Britain's cornfields deepened yesterday.

Newlyweds Geoff and Corrine Cross found more of the circles in a field near Warminster on their honeymoon.

Last week a farmer in East Lothian claimed that similar circles were caused by rooks pecking at grain, causing it to fall outwards in increasing circles.

But Geoff and Corrine say that corn in the circles they found had been flattened in a clockwise pattern; and the circles were evenly spaced, like five dots on a dice.
