

E.T., STAY HOME: Better watch out who — or what — you pal around with. It may be against Chapter V, Title 14, Section 1211 of NASA regulations. The little known rule gives the space agency the power to quarantine any person who has been “extraterrestrially exposed.” If you’ve met an alien recently or touched someone who’s met an alien, or even a moon rock, keep your eyes open. Someone with a badge may be gaining.
