CLOSE encounters with a mysterious light in the night sky has baffled a Bosham woman and she is now appealing to News readers who may have seen similar "strange lights."

Mrs. Alexandra FitzSimons says she twice saw a large object of light, about the size of a distant full Moon, above her Walton Lane home.

"As I watched it began to move away to the east, a light flashing from it every couple of seconds or so until it passed out of sight," she said.

During the second sighting Mrs. FitzSimons went out of her house to watch "four lights, like a Maltese Cross."

No reports

"I watched as it began to move east. I could hear nothing so it could not have been an aeroplane of any kind," she said.

Mr. Peter Littlejohns, of the South Downs Astronomical Society, said he had not received any other reports of the strange sightings.

"Occasionally, fire balls will split up, like shooting stars, and sometimes they can go quite slowly," he said.
