

'Despite a massive cover-up, News of the World investigators have proof that the mysterious craft came to earth in a red ball of light. An American airman who was there told us there were three beings in silver space suits aboard the craft. . . . More seriously, they produced a supporting statement from a named American Air Force colonel, which we reprint on the right. And an American UFO expert who said 'You can't hide the truth for ever.' Which is where Ian Ridpath takes up the investigation.

A flashlight in the forest

FOUR Christmases ago, something remarkable was said to have occurred outside the US Air Force base at Woodbridge, near Ipswich. News of the event leaked out slowly, finally hitting the headlines in October 1983: "UFO Lands in Suffolk — Official," screamed the front page of the News of the World.

The story was sensational. It told of a group of American airmen who were confronted one night with an alien spaceship in Rendlesham Forest, which surrounds the air force base. According to the story, the craft came down over the trees and landed in a blinding explosion of light.

The airmen tried to approach the object, but it moved away from them as though under intelligent control. The following day, landing marks were found on the ground, burns were seen on nearby trees, and radiation traces were recorded. There was even talk of aliens aboard the craft, and allegations of a massive cover-up. It had all the ingredients of a classic UFO encounter.

The News of the World's informant was a former US

airman. He was given the pseudonym Art Wallace, for he claimed that his life had been threatened if he talked. Yet here he was freely giving interviews to newspapers and television.

While his fantastic story might be doubted, it was impossible to shrug off a memo written by the deputy base commander, Lt. Col. Charles I. Halt, to the Ministry of Defence, which was publicly released in the United States under the Freedom of Information Act. Halt's memo, reprinted in full here, is not as sensational as Wallace's story, but it is prime documentary evidence of a type rarely encountered in UFO cases.

UFO researchers in Britain could scarcely believe their luck: this was The Big One, final proof that We Are Not Alone. The News of the World paid £12,000 for the story. A book was recently published about the case, and American TV crews have been filming at the site in recent weeks.

All that evidence, backed up by the word of the US Air Force, could not possibly have a rational explanation.

UFO LANDS IN SUFFOLK

And that's OFFICIAL

NEWS OF THE WORLD INVESTIGATES BY KEITH BRANLEY

Or could it? Here are the facts that you have not been told.

Soon after the News of the World story appeared, I went in search of local opinions about the case. I made contact by telephone with a forester, Vince Thurkettle, who lives within a mile of the alleged UFO landing site. "I don't know of anyone around here who believes that anything strange happened that night," he told me.

So what did he think the flashing light was in Rendlesham Forest? I was astonished by his reply. "It's the lighthouse," he said.

That lighthouse lies at Orford Ness on the Suffolk coast, five miles from the forest. Thurkettle plotted on a map the direction in which the airmen reported seeing their flashing UFO, and found that they were looking straight into the lighthouse beam.

Could this really be the answer? I visited the site with a camera crew from BBC TV's Breakfast Time. On the way there, the cameraman was sceptical about the lighthouse theory. I didn't blame him.

It was gone midnight when Vince Thurkettle took us to

the site of the alleged landing, and it felt spooky. The area had by now been cleared of trees as part of normal forest operations, but enough pines remained at the edge of the forest to give us a realistic idea of what the airmen saw that night.

Sure enough, the lighthouse beam seemed to hover a few feet above ground level, because Rendlesham Forest is higher than the coastline. The light seemed to move around as we moved. And it looked close — only a few hundred yards away among the trees. All this matched the airmen's description of the UFO.

The conclusion was clear. Had a real UFO been present as well as the lighthouse, the airmen should have reported seeing two brilliant flashing lights among the trees, not one. But they never mentioned the lighthouse, only a pulsating UFO — not surprisingly, since no one expects to come across a lighthouse beam near ground level in a forest.

So startlingly brilliant was the beam that the television cameras captured it easily. The formerly sceptical
