

Colonel Charles Halt's memo on official American Air Force notepaper was headed "Unexplained Lights", dated 13 January 1981, and sent to the RAF. It said:

1. Early in the morning of 27 Dec 80 (approximately 0300 L), two USAF security police patrolmen saw unusual lights outside the back gate at RAF Woodbridge. Thinking an aircraft might have crashed or been forced down, they called for permission to go outside the gate to investigate. The on-duty flight chief responded and allowed three patrolmen to proceed on foot. The individuals reported seeing a strange glowing object in the forest. The object was described as being metallic in appearance and triangular in shape, approximately two to three meters across the base and approximately two meters high. It illuminated the entire forest with a white light. The object itself had a pulsing red light on top and a bank(s) of blue lights underneath. The object was hovering or on legs. As the patrolmen approached the object, it maneuvered through the trees and disappeared. At this time the animals on a nearby farm went into a frenzy. The object was briefly sighted approximately an hour later near the back gate.
2. The next day, three depressions 1 1/2" deep and 7" in diameter were found where the object had been sighted on the ground. The following night (29 Dec 80) the area was checked for radiation. Beta/gamma readings of 0.1 milliroentgens were recorded with peak readings in the three depressions and near the center of the triangle formed by the depressions. A nearby tree had moderate (.05-.07) readings on the side of the tree toward the depressions.
3. Later in the night a red sun-like light was seen through the trees. It moved about and pulsed. At one point it appeared to throw off glowing particles and then broke into five separate white objects and then disappeared. Immediately thereafter, three star-like objects were noticed in the sky, two objects to the north and one to the south, all of which were about 10 degrees off the horizon. The objects moved rapidly in sharp, angular movements and displayed red, green and blue lights. The objects to the north appeared to be elliptical through an 8-12 power lens. They then turned to full circles. The objects to the north remained in the sky for an hour or more. The object to the south was visible for two or three hours and beamed down a stream of light from time to time. Numerous individuals, including the undersigned, witnessed the activities in paragraphs 2 and 3.

  
CHARLES I. HALT, Lt Col, USAF  
Deputy Base Commander

cameraman was convinced. My report was shown the following morning on Breakfast Time, much to the dismay of UFO spotters and the News of the World reporter.

The lighthouse theory soon had its supporters and its detractors. But there were still too many open questions for the case to be considered solved. For instance, what about those landing marks?

Some weeks later I returned to Rendlesham Forest in search of answers. The landing marks had long since been destroyed when the trees were felled, but I now knew an eyewitness who had seen them: Vince Thurkettle. He recalled for me his disappointment with what he saw.

The three depressions were irregular in shape and did not even form a symmetrical triangle. He recognised them as rabbit diggings, several months old and covered with a layer of fallen pine needles. They lay in an area surrounded by 75ft tall pine trees planted 10ft to 15ft apart — scarcely the place to land a 20ft wide spacecraft.

The "burn marks" on the trees were axe cuts in the bark, made by the foresters

themselves as a sign that the trees were ready to be felled. I saw numerous examples in which the pine resin, bubbling into the cut, gives the impression of a burn.

Additional information came from other eyewitnesses — the local police, called to the scene by the Woodbridge air base. The police officers who visited the site reported that they could see no UFO, only the Orford Ness lighthouse. Like Vince Thurkettle, they attributed the landing marks to animals. The case for a landed spaceship was looking very shaky indeed.

What had made the airmen think that something had crashed into the forest in the first place? I already knew from previous UFO cases that a brilliant meteor, a piece of natural debris from space burning up in the atmosphere, could give such an impression. But I was unable to find records of such a meteor on the morning of December 27.

Here the police account provided a vital lead by showing that Col. Halt's memo, written two weeks after the

event, had got the date of the sighting wrong. It occurred on December 26, not December 27.

With this corrected date, I telephoned Dr John Mason, who collects reports of such sightings for the British Astronomical Association. He told me that shortly before 3 am on December 26 an exceptionally brilliant meteor, almost as bright as the full moon, had been seen over southern England. Dr Mason confirmed that this meteor would have been visible to the airmen at Woodbridge as though something were crashing into the forest nearby. The time of the sighting matched that given in Col. Halt's memo.

Finally, I turned to the question of the radiation readings. I learned that readings like those given in Col. Halt's memo would be expected from natural sources of radiation such as cosmic rays and the earth itself. In short, there was no unusual radiation at the site.

As for the star-like objects in the final paragraph of Col. Halt's memo, they were probably just that — stars. Bright celestial objects are the main

culprits in UFO sightings, and have fooled many experienced observers, including pilots. The object seen by Col. Halt to the south was almost certainly Sirius, the brightest star in the sky.

If it seems surprising that a colonel in the US Air Force should identify a star as a UFO, consider the alternatives. Is it likely that a bright, flashing UFO should hover over southern England for three hours without being spotted by anyone other than a group of excited airmen? And if Col. Halt really believed that an alien craft had invaded his air space, why did he not scramble fighters to investigate?

UFO hunters will continue to believe that an alien spacecraft landed in Rendlesham Forest that night. But I know that the first sighting coincided with the burn-up in the atmosphere of an exceptionally bright meteor, and that the airmen who saw the flashing UFO between the pine trees were looking straight at the Orford Ness lighthouse. The rest of the case is a product of human imagination.
