# Mysterious night light

A bright light, apparently stationary, which appeared in the sky near Edzell last night left villagers puzzled as to its identity.

It appeared west/south-west of the village, in the direction of Menmuir, at an angle of about 45 degrees to the horizon, and did not seem to move for about 10 minutes.

Then it disappeared behind Lundie Hill. One man who kept it under observation said it was too steady to have been the lights of a helicopter.
