SUPER-secret delivery of an alien baby to one of nine beings aboard a UFO that crashed in Russia was disclosed in a classified report by a scientist who witnessed it. The crash of the starship was revealed in a story in *The NEWS* last month, right.

Soviet doctors incredibly claim to have delivered the alien baby of one of nine extraterrestrials rescued from the wreckage of a starship in September!

The stunning development came to light in a classified report that was smuggled into Yugoslavia several weeks after the sensational story of the aliens' rescue appeared in the October 29 edition of *The NEWS*.

Yugoslavian sources said the birth of the infant in a top-secret facility near Moscow took the Soviets by complete surprise. The newborn creature was so grotesque, they added, that doctors initially refused to believe that it could possibly be alive.

In an official memo addressed to Soviet research scientists, Dr. Sapor Kurylev said the newborn looked nothing like the adult aliens and that even they appeared to be shocked by its appearance.

"I supervised the delivery from

beginning to end," he wrote. "But when the thing began to squirm and rear its head, all I could think was, 'Oh my God, it's alive.'"

"It was so ugly and misshapen. It looked like a reptile, a reptile that sprang to life in the screaming agony of a nightmare."

A log of the alien baby's progress and behavior is comprised of four hourly entries followed by a handwritten autopsy order. It is not clear, however, whether the infant died of natural causes or was killed

by scientists. "The suggestion that the baby was killed may be between the lines, but it appears throughout the report," the Yugoslavian biophysicist, Zikovic, told reporters.

"There is no doubt that the Soviets were shocked and maybe even a little frightened by whatever it was the alien mother brought into the world."

Zikovic, who refused to reveal his entire name fearing Soviet reprisals, said the infant's birth weight was 3 pounds, 7 ounces. It was slightly longer than 13 inches, and the shape of a football.

"It apparently had three appendages, legs or arms, that were covered with a thick coating of scales," he said.

"The head was similar to that of a lizard, with tiny black eyes, no nose

Oh my God, it's alive!

RUSSIAN DOGS DELIVER

ALIEN BABY!

Soviet researchers rescued nine injured space aliens from the burned wreckage of a starship and are now studying them at a top-secret facility near Moscow, classified documents show.

The smuggled report surfaced in Yugoslavia seven weeks after the fiery crash near the Siberian port city of Nyda, and has been authenticated by dissident scientists in the U.S.S.R., Yugoslavian sources confirmed.

According to the report, the crash and recovery of the alien survivors followed a week of unprecedented UFO activity in Siberia. Crash casualties reportedly were high. But the survivors — though

— appeared to be recovering

at astonishing speed. The creatures were described as looking like human children with three shocking exceptions — they seem to be sexless, are covered with microscopic, flesh-colored scales and have no mouths.

A Yugoslavian biophysicist told reporters that the Soviets were prepared to spend millions on the research effort.

"The documents I received from friends in the U.S.S.R. make it clear that Soviet priorities are one, to nurse the aliens back to health, and two, to establish some means of communication," said the scientist, who refused to identify himself beyond the code name "Zikovic."

"There is evidence, even in the preliminary report, that they were well on their way to accomplishing both objectives. The aliens were said to be both durable and cooperative."

There had been no verbal communication between the

and a single nostril. Skin color was described as being bluish."

As reported in *The NEWS* in October, the adult aliens look like human children with the exception that they don't have mouths and are covered with microscopic, flesh-colored scales.

The latest documents to surface in Yugoslavia made scant mention of the adults. They did contain a

brief reference to the mother, who reportedly recovered from the delivery of her baby within minutes and showed no remorse over the death of her child.

"It would seem that the aliens have recovered from the injuries they suffered in the crash and perhaps have been moved to another facility," said Zikovic.

"We know their priority was to get them healthy so that they could concentrate on finding some means to communicate.

"If that's what they're working on now, let's hope they succeed soon. Maybe then the Kremlin will go public with all this — and give the world the whole story."
