

Also, I thought you may find this interesting, from the Crawley News, 13/11/85:

CRAWLEY police constable Mike Neville had a close encounter of a most peculiar kind this weekend.

As he was going about his duties just after midnight on Friday, he spotted what he described as an unidentified flying object hovering above the Starlight car park in the High Street.

He reported it as a large circular object about a mile in

diameter, with a rotating light on top of it. It was quite silent, and surrounded by blue and white fog or smoke.

So was Crawley the scene of a visit from alien beings? "We're forming no conclusions," said a police spokesman. But police have sent a telex to the Ministry of Defence at RAF West Drayton.

I am curious to know how many other UFOs are reported as a mile (?) in diameter, and if it was this large, how could he see a light on the top of it? Ah, well!

Yours,
Michael Slatter
