

# UFO brings back man missing since 1975

A MAN who mysteriously vanished without a trace from his ranch in 1975 has returned just as mysteriously—and he hasn't aged a day in the meantime.

## Stifling

Jose Estevez disappeared 11 years ago with his terrified wife, Susannah, as the only witness. She swore he was spirited away in a UFO, but neighbors scoffed.

"We all knew that Jose was a run-around," Pedro

by DANIEL PETERS

Diaz, who owns the ranch next to Estevez, notes.

"His wife refused to see it, but we all knew he'd jump at the chance to get away.

"They had five kids and they drove him crazy. He was happiest at the canti-

na with some sweet young thing—or out in the fields with his cattle."

So when Susannah hysterically phoned the local Mexican police to report his bizarre disappearance in a "flying saucer," they were skeptical to say the least.

She even called authorities in Puebla, the nearest city of any size, and they hung up on her.

"Everyone figured he ran away with some girl, and that his wife made up the story to save her wounded pride," Diaz continues.

"She stuck to her weird story though, but finally accepted that he was gone for good," says Diaz.

## Hovering

"With her eldest boys, she managed the ranch herself, and did quite well with it."

One day recently,

## ...& he hasn't aged a bit

however, Susannah was out with the herd of cattle and saw the strange flying craft again, hovering above the same spot where it had abducted her husband.

Then she saw him leave the silent, spinning disc through an opening underneath and walk towards her.

"I was overjoyed to see him!" she said afterwards through an interpreter.

## Different

"Yet he seemed different somehow. A few hours later I realized why when I watched him standing next to our eldest boy," she says.

"We had all aged 10 years, and he didn't look a day older."

Incredibly, Jose Estevez doesn't remember a thing about his supernatural, in-

tergalactic adventure. He was stunned to find out that 11 years had come and gone.

"I remember watching the flying saucer above the pasture where my herd was grazing, and the next thing I recall was walking towards my wife—but suddenly I find out it's 11 years later.

"We can't explain it. But here I am, same as I was in

1975, and my wife Susannah, who has never told a lie in her life, looks 10 years older to me," Jose says.

Reportedly, Mexican authorities are interested in looking into the matter further.

"But they're too busy still with helping rebuild and settle people after the disastrous earthquake last fall," Susannah says.
