

Expert makes startling discovery...

# Space aliens pose as humans in Pentagon

UFO expert Roland Burke claims aliens from other planets have disguised themselves as humans and are working in high level positions at the Pentagon.

"Aliens have become our military's most important decision makers," says Burke, who also claims members of the White House staff are from distant planets. "They have infiltrated our entire defense system and now control the fate of mankind.

"We are no longer in charge. We are at their mercy," he states.

## One-half

Burke believes the aliens have taken over 20 years to advance in our military's rank, thereby putting themselves into high level Pentagon positions.

"Now that they're in control, I fear the aliens will begin substituting their own look-a-likes for the rest of the Pentagon staff.

"I believe over one-half of the Pentagon workforce at the moment, are UFO aliens," he states.

Burke feels the United States' aggressive atti-

tudes and actions against Libya, Russia and the invasion of Grenada have all been masterminded by the aliens.

"The United States at one time could have been called the Policemen of the World. Now, we are becoming aggressive, angry and anxious to go into combat.

"This is not the American way. We are being pushed into a major world

war by beings from another world.

"And we are powerless to do anything about it," Burke contends.

The UFO expert feels the alien infiltration has already reached into the White House as well.

## Advisors

"I believe several cabinet members and presidential advisors are beings from another world," he says. "I fear that before long, alien look-a-likes will hold every important position in our government, including the presidency."

Burke started compiling data for his theory 15 years ago when he began spotting slight physical differences in some of the Pentagon staff.

"I was attending a UFO seminar at the Pentagon when I noticed several staff members had a sixth finger on their left hand," Burke states. "I thought that unusual, and jotted their names down on a pad. Several days later I purposely bumped into each one again. This time, they all had five fingers."

## Glow

Burke believes the aliens were able to read his mind and adjust their physical appearances.

"Soon after that I noticed another staff member in the Pentagon washroom. As he combed his hair I noticed his eyes had a strange red glow to them. As soon as I noticed it, his eyes returned to normal," says Burke.

Again, Burke contends the alien was able to read his mind and alter his physical appearance.

"These same men that I observed so many years ago are now the men who are in control of this country's defense systems," Burke says. "I fear they

have grown in numbers and in less than 10 years will be in complete control."
