

More lights in Brazil sky

MAR 25 - 5 - 86

SAO PAULO, Sat. — Further sightings of unidentified flying objects (UFOs) were reported in Brazil today as an investigation continued into the scrambling of fighters on Monday to intercept objects that appeared on radar screens.

Brazilian television showed film of a glowing, round object in the sky which was said to have been taken last night by a freelance cameraman near Maringa, in the southern state of Parana.

On Wednesday afternoon the air force base in Fortaleza, capital of the north-eastern state of Ceara, received numerous calls from residents about a dark, cigar-shaped object seen in the skies, the *Jornal do Brasil* said.

The Air Force Ministry has summoned pilots of three F-5s and two Mirage jets ordered into the air on Monday from bases in southern Brazil to report on the sightings, which lasted for several hours and disrupted civil air traffic.
