

UFO aliens make woman, 86 pregnant

AN ELDERLY woman says she's pregnant by UFO aliens, and doctors here on Earth not only believe her, but claim she is about to give birth to a monster.

Marie Leduc, 86, told authorities she was abducted from her farm outside Lyons, France, and whisked away inside a large silver spacecraft by bizarre space aliens.

"There were six aliens, and they walked right through my front windows without breaking the glass," says Marie.

Dragged

"I was sure the Devil was coming to get me," she adds.

Marie describes the aliens as having reddish skin, wings, and large heads that kept turning different colors.

"They grabbed me and dragged me out my front door, right into their flying saucer," she adds.

Marie says she was then strapped to a table as the spacecraft lifted off the ground and sped off into the sky.

"I was terrified," she admits. "These funny-looking creatures kept poking me with all kinds of needles and things.

"Finally, they put some kind of gas mask on me and I fell asleep."

Terrified

When Marie woke up, she found herself back on her farm.

"I had awful stomach cramps, and when I looked at myself in the mirror, I discovered I had fresh stitches on my abdomen.

"I immediately called my doctor and told him what happened to me. I was terrified that the space aliens cut me open and placed something inside of me," she adds.

After being examined by her doctor, he requested Marie be placed into the hospital for examination.

There, doctors told her she was pregnant.

Embryo

"I knew they put something inside me," says Marie. "But who would have thought it'd be a baby."

Doctors examining Marie say an alien embryo is alive and growing inside her womb.

"Apparently, the woman's story is true, and she has been implanted with an alien life force," says Dr. Emile Gustave. "It seems the baby will be fully developed by October. There is also no doubt

Docs say monster baby due in Oct.

by RICHARD DOMINICK

the infant is a hideous monster," adds Gustave.

Laser photographs taken of the unborn infant show that like the aliens described by Marie, it also has an enormous head and is developing wings.

"It also has a full set of razor-sharp teeth," adds Dr. Gustave.

Marie is now being kept isolated at a private institution, where doctors

are monitoring her pregnancy.

"She is in much pain," says one of the doctors examining the elderly woman. "This is an alien pregnancy and totally different from anything anyone has experienced on Earth before.

"Miss Leduc is 86-years-old and is having difficulty," he adds.

According to reports, Marie's womb has expanded to six times the

size of a normal womb during pregnancy.

"The alien baby already weighs approximately 30 pounds and is frantically kicking and clawing at the walls of her womb," adds the report.

Gift

Doctors intend to let the pregnancy run its course, which they estimate to be six months.

"Marie has requested we do not do anything to dis-

turb the infant's birth," adds Dr. Gustave.

"She believes the infant is a gift to our planet from the aliens and does not want the pregnancy terminated whatsoever," says the physician.

"She is a very brave woman," says Dr. Gustave.

"She is in much pain but wants to mother the child, no matter what it turns out to be."

Marie is due to give birth in October.
