

'Mushroom' cloud scare

(?)

These Submarines??

REPORTS of a mysterious blast in the sea between Sweden and Finland are being probed by defence authorities in both countries.

The first-mate of a car ferry said that early on Tuesday morning he saw a bright light rising out of the sea and a 450ft-high mushroom-shaped cloud of smoke.

'It looked just like an atom bomb explosion,' he said.

A Swedish defence spokesman said last night: 'We are going to take a closer look.'
