

Couple see a strange shape in the sky

A Telford woman who saw a strange shape in the sky yesterday afternoon said she was "shaken" by the experience.

At three minutes past four Mrs Kathleen Richardson, of Chuckleys Meadow Leagumery, said she had been looking out of a bedroom window when she saw something big and round.

"It was far away. There was no

cloud, it just went up. It was dark on the bottom and it was wavering around. The sunlight was catching it and it was silver on top," she said. She said her husband saw it, too. They are sure it wasn't a plane or a helicopter. "There were no lights on it," she said.

"It seemed to go across a bit and up, it was wavering and it just disappeared," she said. "I want to know what it is. I have never seen anything like it before. It has shaken me," she said.

A spokesman for RAF Shawbury said there had been no flying in the area during the afternoon. The aircraft control tower had not been in operation either.

Telford police said they had had no reports of anyone seeing anything unusual in Leagumery during the afternoon.
