

UFO kite alert

THE Government was urged today to consider the potential danger to aircraft of a new toy kite, capable of flying at 2,000-feet — ten times the legal limit.

The kite, "UFO-Sam", has been described as "the toy of 1987" and is due to appear in the shops in the New Year.

Mr. Doug Hoyle, Labour MP for Warrington North, has written to Mr. Michael Howard, the Consumer Affairs Minister, asking him to examine the kite to establish whether it constitutes a danger to aircraft.
