## FAA: Radar Tapes Fail To Confirm UFO

ANCHORAGE, Alaska (UPI) — A review of radar tapes failed to confirm an unidentified flying object in the flight path of a Japan Air Lines cargo jet over Alaska on Nov. 17, a Federal Aviation Administration spokesman said Wednesday.

The FAA has concluded that the unidentified object on radar now ap-

pears to have been an unexplained split image of the JAL Boeing 747 and not a separate object.

The FAA interviewed co-pilot Takanori Tamefuji for the second time Tuesday, and he reiterated that the crew had seen lights near the jumbo jet as it flew from Reykjavik, Iceland, to Anchorage.
