

Jupiter suspected as UFO

NEW YORK — A Japan Air Lines pilot who claimed to have seen an unidentified flying object alongside his airplane in November actually was seeing an unusually bright image of the planet Jupiter and possibly Mars, an investigator said Tuesday. Philip J. Klass, an editor with the magazine Aviation Week and Space Technology and a long-time investigator of claimed UFO sightings, said calculations show Jupiter was extremely bright and was visible precisely where the pilot reported he saw the UFO. Mars was just below and to the right of Jupiter.
