Dear R J M Richard;

I have selected your organization to aid Etheric Beings which provide information to me as a means of disseminating some very important information to the world at this time.

If you desire to report this kind of phenomenon and are impartial without an axe to grind for any particular faith, religious creed or political affiliation, without bias or prejudice Etheric Beings desire to select your organization to present there communications.

I want to convey to you that the means of obtaining this information is not by extrasensory perception or by trance or meditation or even by automatic writing but by direct dictation made possible by a new understanding of this phenomenon as set forth in my booklets teaching about the amplifier in the brain of modern man and communication with Etheric Beings. Essentially anyone can speak with Etheric beings when both the Etheric Guide of that person and the Physical Person understand the means and implications of doing so.

Herewith I present a sample excerpted from some of the data that has been made available to me from Etheric Beings. There is considerably more data I have accumulated which I could present to you for publication.

The Astronauts have asked me to make the following data available both for NASA and for the general public. They do wish for the space program to proceed as rapidly as possible especially in view of the fact of the rare planetary alignment due in 1998 where essentially all the planets will line up in the form of a question mark.

No one can say at this time just how devastating this rare conjunction shall be but we should be striving to understand and prepare for a magnetic storm of possible catastrophic proportions for the Earth. The predicted conjunctions of 1982 were not nearly as dangerous because the planets were not in a direct line conjunction but rather were conjunctions by planets in the form of a shot gun blast as seen from the Earth as being the muzzel where individual planets were in line with each other with lines of conjunction radiating out from the Earth through the sun but not in a form which would multiply magnetic effects such as will happen in 1998.

There are many more thoughts from the Astronaughts as well as many other Etheric Beings in my booklets given to me by direct dictation from Etheric People which wish to tell us much more about survival after physical death.

Since the Astronaughts believe they all died at essentially at the same time by asphixiation after hitting the sea they believe that perhaps some of them could have been saved if they had been found more quickly, resusitated and rewarmed by being put on a heart lung machine to pump their blood through them to warm and oxygenate them systemically.

If this procedure is done for more people dying from cold or drowning the Etheric beings will be able to get the body going again. This will be even more effective if a kidney and or liver Dialyser is also used to rid the body of accumulated waste products built up in the brain as encephalins, and endorphin toxins, lactones, lactates, ketones, dioxides and other aromatic proteinogenous toxins.

We tend to call the Etheric Being a Ghost which does not address to the truth of our electrical body within each of us, plus the electrical body of each of our Guides which lives on after physical death. The electrical body of our Guides which may be able to get a Physical Body going again to a certain extent under certain conditions.

We hope you will print this information under the heading "ETHERIC BEINGS SPEAK."

"We Etheric Beings would like to assure you we are in no way dead but are alive and well but without Physical Bodies. The Astronoughts tend to travel together to speak as much as possible. Etheric Beings can only reach those who desire to be reached by understanding the problem as outlined in the literature available from EBS 1011 BOREN AVE. BOX 179 SEATTLE, WA. 98104."

Would you please send a copy of your literature with advertising materials you usually present for me to evaluate with the intentions of future advertisement if we strike an agreement.

We are currently looking for publishers that will publish Etheric Beings Presentations after a commitment of a going rate monetary agreement.

Feel free to use the enclosed communications in any way you see fit however We would appreciate a by line with address to accumulate names of interested readers. We agree to send any names we get to you for your usage.

NO NAME FOR OBVIOUS REASONS.

Address letters to EBS. addressed as above.

ETHERIC BEINGS INCLUDING THE ASTRONAUGHTS SPEAK!

Etheric Beings believe that mankind is now ready to understand the influences of Etheric Beings and the role they have played with mankind throughout the ages in influencing the electro- force matrix of the body and the matrix of the mind along with a developing person.

THE ETHERIC PLANE OF EXISTANCE * * * *

The Etheric Plane of life is at the electro- forces frequency of occilation or vibration of harmonic resonance usually believed to be somewhat above the physical manifestation of living

beings but within the known spectrum of sound, light and radio frequencies. We ourselves and other beings live on these unseen frequencies of occilation after physical death.

It has been said to me by Etheric Beings that there were Etheric Beings which came from the far planets which created the forms of life in this Solar system. That these Etheric Beings probably came into existance because electro-motive forces acting upon electro- magnetic forces created fluxes and vortices out of which sound was created as the first notes of creation of ALL THAT IS.

Etheric Beings say they know not from whence sentient Beings really first came into existence, they only know that Beings with life are good worthwhile beings to be coveted and loved as treasures of God regardless on which plane of life they live and regardless of which race or creed of men.

As far as is known to us there are twelve primary kinds of beings which are on both the Physical and Etheric Plane of life. These twelve kinds of Etheric Beings are all individuated forces of the four energy forces.

These four forces have been communicated by Etheric beings to be given in a series of teachings to aid mankind in understanding mans heritage and the way these four forces shaped all that exists in the universe.

Etheric Beings of the most ancient derivation known to us on the Etheric Plane have come to tell us their story.

These Beings believe that at first there was only sound for them to hear because Beings could hear each other in the darkness of matter but they could not see anyone to relate to.

Thus the Bible came to say that first there was the word (which is equated with sound) and then God hearing the sound of his voice at that time said it is good to hear myself speak but I would like to see myself and after seeing myself and finding this to be good I desire to see others. This becomes another way to look at earliest creation.

Creativeness working within Etheric Beings aided the four electro- forces of the earth to develop Physical Beings.

The voice of sound entered the various of Beings of all kinds both large and small beginning to come into being upon the Earth.

But the animals could not reason and lived only to kill each other.

Later kinds of Beings with more complex brains developed Physical Beings of today represent and are still being developed and perfected.

COMMUNICATION, FREQUENCY MODULATION & ELECTRETS: * * * *

A fast form of communication of Etheric Beings helps a person to see his entire life pass before him when he dies and shifts to the plane of higher frequency. This accounts for the teachings on judgement day and explains to a person that they must judge themselves when they pass from the Physical to the Etheric Plane.

This is accomplished when the Physical mans ability to think becomes greatly sped up by reason of being out of the physical body.

The physical body and physical brain slow down mentation due to operating on a lower frequency of the electro-magnetic spectrum.

Communications from Etheric beings are given to hasten man into the age of Aquarius when all men shall be able to communicate directly with their Etheric Guides.

ATLANTIS: * * * * *

The ability of mankind to speak to their Guides was closed to mankind after the wars which Atlantis waged upon the rest of the world.

These wars were just as cruel as the wars of today but were of a different nature since the instruments of war were both cruder (bows and arrows etc. and yet some using laser type light from crystals were more sophisticated. It was when Atlantean generals decided to aim energy of the crystals over the ocean areas toward what is now known as Africa that success of aiming the energy for great distances was accomplished.

They began to beam energy into the ground around Atlantis itself for different processes; drilling passage ways up and through mountains, tunnels under the sea, caverns for storage and mining etc. Some of these caverns have been found and used for storage by people such as the natives of South America to hide their treasures from the Spanish and other would be conquerers.

ASTRONAUGHTS SUGGESTIONS; * * * * *

The Astronaughts have come to speak with me and say they have teamed up with Etheric Astronomers as well as Ancient Astronaughts and Russian Astronaughts.

They asked me to make the knowledge herein available to NASA as well as the Russians and the General public.

VAN ALLEN RADIATION BELT & THE ASTEROID BELT; * * * * *

Astronaughts of the ages including the present day Astronaughts say that the

Asteroid Belt and the Van Allen Radiation Belt which forms a ring around the Earth causes a noticeable perturbation of radiation more in some places than in others as we change our position in our travels around the Sun in relation to the density of the Asteroid belt.

Men should build space stations on both sides of this belt to monitor the activity of the bolders, asteroids, or some bodies that are big enough to be called planetoids.

Mankind must learn soon how much of a threat these space bodies are to our planet. We should support research on a space station capable of destroying asteroids while in deep space. We would not know soon enough from an Earth bound detection station of one of the huge asteroids coming at us unless we were just lucky enough to see it.

We should think in terms of colonizing the moon in ways which will hold it in position otherwise we will deal with that planet on our door step someday.

Mankind must understand the moon to be a dipolar electret held stationary that is not rotating on its axis due to its own dipolarity panelization.

It has been suggested that simple space stations could be put into orbit as a tube closed on each end having a bubble weightlessness work area orbiting in a path around the Earth with the form of a polar body having the poles rotating at a tangent to a

line drawn between the space station and the Earth. The two ends could rotate around the center bubble with the bubble work area remaining stationary.

Space stations which rotate at a tangent to the polar magnetic lines of force between the Sun and planets will provide a better gravity field at the polar ends of the space station allowing the astronaughts to be more efficient in their work. They should not lose their equilibrium as easily and be able to think better.

The reason for some of motion sickness in space can be accounted for in realizing that a space station rotating or orbiting in a direct conjunction or radian of the Earth, Moon, and the Sun or another planet causes the mind of both the astronaut to be effected by the polarity of the magnetic lines of force between the Planets and the Sun. More so at times when the polarities of the Earth Moon and Sun's panels of polarity are all in conjunction.

Even a small amount of gravitational force will make the tissues and organs of the body function better. The Astronauts say that a slight gravitational effect would lessen the cause of sickness which may come from bodily functions of defecation and urination in weightlessness. This plagued the Russian astronauts more than the Americans due to inadequate air cleansing.

A further suggestion from all the Astronauts would be for NASA, the Russians and the general public to follow the suggestions for a better anti-viral nutrition program designed to feed the person and starve virus, not only while in space but also in daily nutrition. They have learned that an effective anti-viral and anti-bacterial nutrition program is available from ACHI 1011 Boren Ave. Box 179 Seattle Wa. 98104. Certain aspects of the nutrition program available from ACHI will probably turn around the threat of AIDS.

As far as we Etheric Astronauts of all time can determine the Asteroid Belt is on the one hand drawing our planet closer to it and on the other hand pushing us toward the Sun. When we consider what has been said above about electrets and the activity of the forces of gravity we realize that we must pay attention to this phenomenon.

The Astronauts say we need to look at the magnetic radiation of the Sun and the planets in another way. It is apparent that there is a sine wave of magnetic influences from planets

and the Sun which sets up vortices of radiation in panels of radiation and that space should be evaluated as to the radiation zones of these panels to place the space stations in areas of less magnetic turbulence.

These men also believe that mankind needs to attempt to prepare themselves to leave this planet someday soon. The time may be much shorter than most men believe and longer than what others believe. It would be best to be as practical as possible and not hide our heads in the sand.

We need to pay attention to the possibility of Marduk returning in a backwards orbit about the Sun. No one really knows at this time for sure if the predicted return will be soon but the possibility exists.

The signs are upon the Earth that it happened very quickly when it did happen in the past with very little warning that the planet was upon us and most of the races of mankind were wiped essentially from the face of the planet about 4,000 years ago when Atlantis and Lemuria were covered with water and oil which came from Marduk.

Astronomers and Physicists should study the effect of magnetic forces from planetary bodies far more than they have in the past. This study should be markedly increased and funded to study the coming alignment of all of the planets in approximately 1998 when it is believed there will be an alignment in the shape of a question mark which will form a magnetic flux between the planets.

This configuration of the planets along with the Sun may indeed cause some sort of catastrophe among the planetary bodies due to extreme flowing of magnetic forces causing magnetic storms of a great magnitude and depending upon alignments of the various bodies could cause a major disaster among the planets.
