UFO sightings

RE UFO sightings and R. Jones letter. Mr Jones is correct about "thousands of sightings recorded" but incorrect in his assumption that they do not come from other planets. (Where else would they come from?).

Since Adamski's book "Flying Saucers Have Landed" published in 1952, containing actual photos of UFOs, there have been many other books and messages from these visitors from other planets, who communicate by telepathy.

These messages give the reason for their visits, and the reasons why we are more undeveloped than most other planets, and how they will help mankind when/if nuclear war comes.
