

U.S. BURIED UFO BODIES

& DATA: BOOK

LONDON (Reuters) — The U.S. held a top-secret investigation into Unidentified Flying Objects (UFO's) after World War II and found the bodies of four humanoids from a crashed flying saucer, according to Britain's leading UFO expert.

The Observer newspaper yesterday quoted UFO researcher Timothy Good as saying a U.S. government committee code-named "Majestic-12" examined and then covered up news of UFO crashes in the late 1940s.

According to Good's

book "Above Top Secret: The Worldwide UFO Cover-Up," to be published in July, the MJ-12 committee was set up by President Harry Truman to check reports of unidentified aircraft sighted in the U.S.

Following a report from a local farmer, the committee launched a search for a crashed UFO in a remote area of New Mexico in 1947.

They found the bodies of four humanoid creatures, Good said.

Good quoted from a briefing paper prepared by then CIA head Roscoe Hillenkoetter for Truman's successor, President Dwight Eisenhower.

"Four small human-like beings had apparently ejected from the craft at some point before it exploded," the document said.

The Observer said it had seen the briefing paper but inquiries to several U.S. archives had failed to authenticate it.
