

# ***UFOs are real — I've seen 'em***

Editors: The stories about UFOs are one of the reasons I like your newspaper. I clip and save every story that you print about them because I know they exist.

The skeptics should get the city lights out of their eyes and go out in the country now and then and just maybe they too would know UFOs exist. All they would have to do is look up once in a while and they would see them!

I live in the country and I have seen a few of these "nocturnal lights." I have seen five white lights and one reddish-orange light since 1965. They made no sound. On Oct. 31, 1985, I saw an emerald green fireball pass by. It made a sizzling sound. — A.N., Wellston, Okla. *WEEKLY WORLD NEWS 23-JUNE-87*
