

# UFO man's story of terror in the night

● FROM Page 1

But trucker Dan Johnson was judged totally sane ... and now the authorities are having to face the fact that his story is true.

And Dan's account is corroborated by another trucker.

He saw the flying saucer land, put his foot down and alerted police from the first phone box he came to.

Family man Dan, 41, of Tingsryd, Sweden, told me: "I was driving home when I saw the huge UFO. It was about 250ft. wide and 30ft. high and it hovered over the road.

"When it disappeared I drove home and got my camera. It was about 1 am.

"Suddenly it was there again. I was scared stiff. I almost crashed into the UFO as it landed, and my car stalled.

"Aliens came out towards the car. They were man-sized with bodies like tree bark and onion-like heads. One opened the car door and I screamed as I've never screamed before.

"I was pulled out, kicking and struggling."

The approach of a timber lorry saved Dan. Its headlights picked up the UFO and the aliens took off.

Dan collapsed, to be discovered by police out searching after the timber lorry driver's call.

Swedish military experts gave Dan lie-detector tests. He passed them.

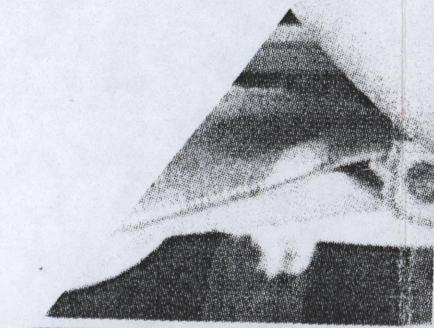

Psychoanalysts said: "He's telling the truth."

And a hospital spokesman said: "We laid traps to see if he told lies - but he didn't. His story appears to be true. A UFO did land."

● DAN has volunteered to travel to Britain to take any lie detector or truth test.

EXCLUSIVE by Charles Renfrew

A TERRIFYING Close Encounter of the Third Kind is baffling experts. After the most extensive tests they say - OFFICIALLY - that the victim is telling the truth about seeing a giant UFO land and being chased by aliens.

The Close Encounter left a tough truck driver so gibbering with terror that police patrolmen who found him thought he was an escaped loony. They took him to hospital in a strait jacket.
