

## UFOs reported sighted in northwest China

HONGKONG (AFP). — Residents in northwestern China have sighted unidentified flying objects (UFOs) several times in the past few months, a pro-Beijing newspaper here reported yesterday.

*Wen Wei Pao*, quoting the *Chongqing Evening News*, a daily in China's northwestern province of Sichuan, said UFOs had been sighted on several occasions since February, following a circular flight-path over three towns. They appeared for half an hour at night and followed the same flight-path on each sighting.
