# Mystery of UFO 2374 seen cruising across the Fens

CLAIMS by a Cambridgeshire man that he spotted a UFO near Ely are to be investigated by a national organisation which collates information on space phenomena.

Mr Leslie Woodbridge is convinced he saw a spacecraft while driving across the Fens to work early on Friday.

"I wasn't dreaming. It was incredible, the most fascinating thing I have seen in my whole life," he said.

Mr Woodbridge, 48, of The Chestnuts, Barway, near Ely, was driving along Main Street, Prickwillow.

He glanced out of the side window of his car just after 7 am and claims he spotted the UFO.

"I thought at first it was an aircraft, but its shape, speed and colour soon convinced me it was something far more strange," he said.

He said the craft was saucer-shaped and glowing bright white, the intensity of the whiteness increasing towards the tail.

He watched it for about 30 seconds as it cruised and suddenly accelerated out of sight.

Details are being taken by the Aetherius Society, a national organisation which is trying to collate UFO sightings.

Leslie Woodbridge... spotted a UFO.

A member of the society, Mrs Brenda Slattery, who lives at Ashley, near Newmarket, said she would glean as many details from Mr Woodbridge as possible and pass them on.

The two big United States Air Force bases in the area, Lakenheath and Mildenhall, could not shed much light on Mr Woodbridge's claims.

At Lakenheath a spokesman said: "On Friday we did not have any aircraft flying at all."

And at Mildenhall a spokesman said they only had two outgoing flights, but none landed early that morning.
