

Double sighting of the glowing eggcup UFO

Standard Reporter

TWO groups of people have reported credible separate encounters with a UFO in Australia and experienced voice changes, police said today.

In the first sighting, a family of four claimed their car was chased by an eggcup-shaped flying object along a remote highway, plucked from the ground and covered in a sort of volcanic ash.

Faye Knowles, a mother of three, said her speech and that of her sons became slurred during the encounter.

The crew of a tuna boat 50 miles away said they were buzzed by an unidentified flying object and their voices became blurred as a result.

Police said the sightings

occurred minutes apart. "We were a little sceptical at first," said Sgt Jim Furnell of Ceduna police in South Australia. "But after investigating, we are treating the reports very seriously."

Forensic scientists will examine the blackish powdery ash found inside and outside Mrs Knowles's car. She told police she was driving through the Nullabor Plain from Perth in Western Australia when she saw a glowing object in her rear window at 2.45 am.

"It apparently picked the car up off the road, shook it quite violently and forced the car back with such pressure

that one of the tyres was blown," said Sgt Furnell.

"While it was happening the family said their voices were distorted and it was as if they were talking in slow motion."

Mrs Knowles told police the UFO turned their car around and placed it back on the road facing in the opposite direction.

Sgt Furnell said Mrs Knowles had to drive nearly 400 miles to report the incident. Her car was damaged and covered in ash and the family was shaken.

He said the fishing crew could not have known about the Knowles family's experience when they reported a UFO sighting in the Great Australian Bight.
