UFOs ... please let me know all about them

ONE of the problems experienced by anybody involved with a minority interest group is the lack of serious interest in any cry for help they might make.

My own particular brand of lunacy is an interest in UFOs and related phenomena. Along with the flat earthers and dowzers, we find it difficult to get even a card in the public library establishing the fact that there is an organisation in the area covering such an interest.

I have been seeking for some time to link up with people in the Wellingborough area who have a genuine interest in the UFO enigma (a puzzle which has been with us for many years) in order to conduct research and, more importantly, to provide a channel through which UFOs etc can be reported without fear of ridicule.

There is such an organisation and I am the Wellingborough representative of the Northamptonshire UFO Research Centre. I would be pleased to hear from anyone with a UFO sighting or similar experience to relate.

Our organisation offers complete confidentiality and is sensitive to the possibility that there might have been some degree of trauma associated with such an experience.

I would be pleased to

receive reports by letter at my home address.
