

Strange sight in the sky

AN extremely puzzled woman contacted the Luton News this week with a mystery that she hopes readers will be able to help her solve.

Irene Armstrong of Manton Drive, Luton, has spotted something rather strange in the sky and would like to know if anyone else has seen it too. She describes it as looking a bit like a diamond ring.

"I first saw it on Saturday night and it was there between about 8.30 and 10.30 pm. It looked as if it was over Dunstable way," she explained.

On Sunday night the mystery object appeared again and this time Irene took a closer look through her binoculars. She said: "It was too large to be a star and wasn't yellow. It was a long shape, like a disjointed arrow and had orange lights on it. It looked just like a cluster of diamonds."

Irene's husband Maurice took a look, but he didn't know what it was either, and neither did Irene's daughter or son-in-law.

"It's unexplainable," she said, "I suppose it could be a UFO."
