

Thame town clerk says he's never seen anything like it

More UFO witnesses tell of lights in sky

MORE people are claiming to have seen the UFOs, first spotted last week between Brill and Thame.

The latest UFO-spotters are Thame town clerk Mr Roland Devaney and his wife Val.

They say they saw the same bright spherical object with flashing lights which Mr Keith Walker and his wife Faye spotted from their home in Brae Hill

By IAN TOWNSEND

Close, Brill, on four consecutive nights.

Mrs Devaney said the sight was astonishing.

"It was a circular machine with flashing lights which was around for several minutes before travelling off at very high speeds towards Brill," she said.

Mrs Devaney said she watched

it with her husband from their home on Lea Park Estate, Thame.

Mr Devaney said he had never seen anything like it.

★ And Mr Bryan Wyatt, of Milton Common, said he saw a similar sig^t: a month ago near his home and another two weeks ago when most of the sightings were made

The Walker family in the Buckinghamshire hill top village of

Brill told the Oxford Mail they saw two machines on different evenings two weeks ago.

They saw it with their neighbour Mr Eric Crawford at their home in Brae Hill Close.

And Mrs Faye Walker says it has returned.

Their sighting and the description they gave of the machine was confirmed by a mother and

daughter in Wellington Street, Thame.

Mrs Marie Smith and her daughter Julia, 26, a science graduate, watched the object over St Mary's Church, Thame, before it sped off.

No official body has been able to give an explanation of the machine.

Neither RAF nor USAF bases have had machines like it in the area.
