UFO investigators at work

PINCHBECK UFO "detective" Mr Andrew Cochrane has been on the trail of UFO's in Lincoln.

The former Metropolitan policeman, who lives in Viceroy Drive, was appointed a UFO investigator by UFO investigation team SkyScan, in March.

Since then he has followed up several reports of lights in the sky, but all have been found to have a rational explanation.

Just one of his UFO investigations has been in Lincoln, where one man claimed he had seen a vast array of lights in the sky.

But Mr Cochrane's investigations concluded that the lights were in fact a large jet fuel tanker refuelling a number of aircraft.

"Over 99 per cent of all sightings have a rational explanation and this was just one of them," said Mr Cochrane.
