

Is your mum an alien?

IS your mother a descendant of an alien who once mated with a human?

There are thousands of them about.

And there are tell-tale signs to spot them. They call themselves Star People.

They have unusual blood groups and lower than normal body temperatures. And they invariably suffer from chronic sinus problems.

Often they have psychic powers and radiate a strange energy which makes people around them feel good:

Most strangely of all, Star People have an extra vertebrae.

And they are extremely sensitive to light.

Their eyesight is very good and their hearing is ultra sharp.

They are also able to thrive on little sleep.

The identikit picture of a Star Person has been compiled by American housewife Francie Steiger, whose husband Brad is a noted UFO researcher in the States.

Francie said: "I am a Star Person. My role in life is to start the grassroots movement for the Golden Age which is coming before the year 2000.

"When the new age arrives

there will be no poverty or sickness, people will live long and happy lives free of trouble.

"Thousands of Star People have contacted me. They have all had the same dream in which two men who are aliens say, 'now is the time.'

Los Angeles estate agent Faye Thompson said: "The reason we are here is to prepare earthlings for the coming out, we are making it easier for you to accept us.

"There is nothing to fear.

"I have all the Star Person's characteristics, including the extra vertebrae.

"I have never felt I really

belonged in my family. I am different because I have very strong psychic powers.

A load of twaddle. Or truth stranger than science fiction.

Alien parents?

Watch your mother closely when she's doing the ironing.

Does she know what you are going to get up to even before you thought of doing it?

Does she have strange powers? Write and tell us.

Write to Aliens Department, Observer, Griffin House, High Street, Crawley.

Star prizes for the best printed.
