

Now lights are seen by Margaret, too

FOLLOWING our report in Tuesday's Express of mysterious bright lights seen in the night sky, a Burnley woman now reports seeing exactly the same thing, at the same time on three occasions.

Margaret Hall hadn't read our first report when she told her friends of her experiences last Friday, Saturday and Monday evenings.

And Margaret freely admits that until last weekend she did not even believe in UFOs, although now she is not so sure.

Our first story told of very bright lights hovering in the sky and spotted by Bill Goulding and his wife, Mabel, as they drove along Bacup Road at around 7-15 p.m. last Friday evening.

Margaret spotted something very similar on the same evening as she walked her dog on Burnley Golf Course at around 7-30 p.m. She reports two incredibly bright lights moving very slowly from the direction of Loveclough towards Bacup.

"There was no noise at all and the lights stopped and stayed hanging in the sky for at least three quarters of an hour before moving off and slowly disappearing," she said.

She and her two young daughters watched them for as long as they could and were amazed to see something on Saturday evening as well.

This time there was only one light, again coming over from the Loveclough direction, and this time it stayed in the sky for more than an hour, says Margaret.

By Monday evening, she

was becoming used to sky watching, and two lights appeared again. Margaret now plans to try taking photographs if she spots the lights again.

"I tried to define a shape by watching them through binoculars, but it was difficult because they were too bright. They seemed to be circular," she said.
