UFO BLOW!

Project Sign was set up in 1948 by the American Air Force to investigate UFO sightings. In 1949, it was renamed Project Grudge, then Project Blue Book. This final project lasted 18 years and looked into 12,600 flying saucer incidents. Only 701 couldn't be explained as weather balloons, clouds, aircraft, the planet Saturn, or someone having one too many in the pub!
