UFO's do exist

UFO's do exist — they land near my house at approx. 6.15am every Thursday.

I wake to the sound of rocket engines, strange rumblings and thuds and a brilliant light flashing through my curtains. My dogs begin to bark furiously but as this is the third Thursday it has happened I am too tired to look. I already know who it is. It's Tyler Team Waste.

If this is the only way they can do the job efficiently (a job our previous men managed to do between 9-5) then please can they turn the light off!
