

Secret

plane

riddle

A UFO spotted by hundreds of baffled sky-watchers may be America's latest hush-hush bomber.

The U.S. Air Force denies that their new wedge-shaped Stealth bomber is based in Britain.

But experts believe that a least one of the sinister-looking 500 million-dollar jets is operating out of an East Anglian airbase.

Fens

Sightings have been reported of a triangular UFO flying low over the fens at night.

Now Mr. Teddy Taylor, MP for Southend East, says he intends to find out if the Stealth bomber is already operating from Britain.
