SCHOOL REVEALS UFO MYSTERY

Unidentified flying objects spotted over Chelmsford last week have turned out to be a lot of hot air. For the UFOs were not the work of alien hands but that of children at the town's Melbourn Park primary school. The youngsters built tissue paper and cane hot air balloons as part of a school project. An eagle-eyed reader spotted the UFO

story in last week's Essex Chronicle and cleared up the mystery launched by the high-flying schoolchildren. Pictured with one of the 'UFOs' are teacher Richard Sawyer, pointing to last week's story, and some of his pupils.
