UFO man is quizzed

UFO investigators are interviewing a Rochford man who saw a V-shaped object spinning in different directions.

At one stage the noiseless object remained still in the night sky and then a red light left it, returned and the object disappeared.

The mystery craft, whose lights changed from blue to white, red and an orangey red, was seen by the 43 year-old Rochford man about 9pm on a Monday.

He asked to remain anonymous in case his friends ribbed him too much.

Southend airport deputy director John Burton said there was no unusual air activity on the Monday night.
