Off the shelf

WE all have opinions about UFO's some feel there must be something (but what?) others think that each sighting can be explained away as nothing unusual.

BUT, these theories are based on the information we are given, the hoaxes, crackpots and scientific explanations.

BUT, what would you say if there was undeniable proof in the hands of governments and intelligence agencies worldwide? That is exactly what Timothy Good has spent many an hour collating not only case histories and interviews with reliable witnesses but hundreds of recently

declassified official papers.

The result is his remarkable book *Above Top Secret* a sensational revelation that rips the lid off the wealth of information that is being withheld from the general public 'in our own interest'? Without doubt a book that should be read by all and will make you rethink your theories whatever they are. Published in paperback by Grafton at £5.99, illustrated.
