

# FLYING SAUCE! IT'S A HOAX

UFO-watchers came down to earth with a bump yesterday when they learned that famous photographs of a flying saucer are a **HOAX**.

Pictures taken by Peter Beard in 1987 appear to show a saucer hovering over Barnsley, Yorks.

But computer analysis of the negatives has revealed that the "spacecraft" was a

**TRANSFER** stuck on a window.

The news was broken to members of the British UFO Research Association in Bradford by official Philip Mantle, who said: "Obviously we are disappointed."

Mr Mantle claimed Beard swore at him when he confronted him over the pictures.
