NW experts to reveal alien invasion details

NORTH West UFO investigators claim to have uncovered evidence of an alien invasion of earth.

And they plan to reveal all their findings at a public meeting at Leigh later this month.

The lecture by leading UFO expert Arthur Tomlinson will focus on cases of human abduction; reports of flying saucers known to have crashed in the USA; and the existence of alien bases in New Mexico.

The group also claims to have possession of previously top secret reports which back their claims.

Capacity

The lecture at Leigh Library's Derby Room on May 17 is the third in a series. The two previous

ones attracted capacity audiences.

Steve Balon, a member of the Direct Investigation Group of Ariel Phenomena, said: "The response to the first two meetings has shown that there is definitely a solid interest in the subject.

"The vast majority would treat it with some scepticism but we feel we have to show people exactly what is going on.

Secret

"There are alien bases in New Mexico and we are going to reveal the exact locations.

"We are in possession of top secret de-classified information released in America and we are convinced that they are genuine documents.

"We will also be touching

on cases of humans being abducted and being subjected to brain implants."

The talk will also be fully illustrated, and there will be video film which includes footage of cattle mutilation.

Said Steve: "There have been literally hundreds of cattle totally drained of blood and with parts of their organs removed."

He added: "As far as we're concerned you can kid some of the public some of the time, but not all of them all of the time."
