# If you have seen a ghost

A CITY "ghostbuster" is appealing for witnesses of alien activity to make contact so he can throw some light on their experiences.

And Mr. Clive Potter promises no cranky supernatural explanations as he has a theory which brings UFOs firmly down to earth.

The UFO expert is currently researching reports

---

by Sarah Pilkington

---

of abductions by aliens from outer space.

He believes there are dozens of county people who have had some sort of paranormal encounter but never said anything about it.

Now he wants to investigate their experiences in a

bid to provide a rational explanation for what people believe happens to them and to help them recover from it.

Mr. Potter, a civil servant and member of the British UFO Research Association, does not believe alien abductions actually take place.

He said: "Ninety per cent of seemingly supernatural

occurrences can be explained away scientifically or rationally. It is the other 10 per cent of cases I am eager to understand."

His theory is that people enter into an altered state of consciousness and have some form of psychic vision of the future and believe they have had the experience first hand.

Mr. Potter can be contacted on Leicester 620538.
