

# RIDDLE OF CIRCLES SOLVED?

**SCIENTIST** Dr Terence Meaden last night claimed to have solved the mystery of the circles that appear in West crops.

His findings will come as a blow to UFO enthusiasts who blame visitors from outer space.

For Dr Meaden believes the circular depressions are formed by spinning balls of air charged with electricity.

Dr Meaden, a physicist and meteorologist from Bradford-on-Avon, has spent ten years investigating more than 600 circles in Wiltshire, Gloucestershire and Hampshire.
