

# SPACE RIDDLE OF UFO 'FORCE'

TWO men probing a series of strange circles which have flattened crops in fields all over the South of England warned last night: The Force is with us.

This summer, 170 of the swirling shapes have appeared overnight. Eleven occurred without warning in Hampshire and Wiltshire on Sunday.

Pat Delgado, former U.S. space agency radar expert said: "There must be some force field manipulated by unexplained intelligence."

He has been looking at the circles with local government official Colin Andrews. They believe a Harrier jet pilot found near circles in 1987 fell to death when his plane crossed a high energy beam that causes the shapes.

Mr Delgado has warned the Ministry of Agriculture that crops inside the rings should not be eaten.

But the Ministry thought the circles were caused by small whirlwinds or fertilisers.
