Bases already on earth

# Twelve-foot tall aliens 'on their way here'

WAR OF the worlds may not be far away, as reports of a UFO landing in the Russian town of Voronezh filter through from the Kremlin.

Ron West, chairman of the UFO research organisation in Britain feels that the story released by the Russian news agency Tass is true.

The agency claims that three aliens, 12 feet tall, strolled around a park in the remote town 300 miles south-east of Moscow.

Tass did not say when the landing occurred, but that it took place shortly after a bright shining ball was seen in the sky. A depression 20 yards in diameter was left in the ground when the spaceship lifted off.

Russian investigators discovered two rocks on the ground where the spacecraft had landed. They were analysed and found to be inconsistent

with rocks normally found on earth.

Mr West said: "The landing has been authenticated by Genrikh Silanov, a respected Russian scientist.

"In any case, this isn't the first time aliens have met with humans.

"Six cases of aliens being seen by humans have been reported to our organisation this year — and that is just in the Southend and Benfleet areas."

## Purpose

Mr West feels there must have been a purpose for the visit, and is sure the Russians have not released all the details.

He said: "You don't know if the aliens have abducted anybody."

Last month Mr West was given an amateur video of a spaceship circling the area. It has been sent to a specialist laboratory in Nottinghamshire to be analysed.

"I believe it to be authentic, or a remarkably clever hoax," he said. "We shall find out in a couple of weeks."

Mr West believes it is likely that the aliens will soon be visiting Britain. "I have documents the aliens already have base on earth," he said.

If you have seen any thing strange in the sky telephone the UFO hotline, 0268 286079.

## UFO over telephone exchange

A COUPLE from Basildon have reported seeing a UFO hovering over the town telephone exchange.

They watched the circle of red, green and white light for about 30 minutes before it moved off.

Twelve other witnesses reported a similar sighting.
