● **THEY'VE** landed — and it's **OFFICIAL**. An alien spaceship manned by giants with tiny heads has beamed down in Russia, the Soviet news agency Tass said yesterday.

● Hundreds of terrified people saw the UFO — a large shining ball — hovering overhead. It landed in a park in the city of Voronezh 300 miles south-east of Moscow.

● Then three creatures about nine feet tall and similar to humans emerged with a small robot for a walk.

● Scientists later found a 20-yard wide depression and rocks that were like none found anywhere on Earth.
