

Some test.

This is what he could find

SPACEMAN Robert may be glad that he studied karate — for scientists say that giant creatures with tiny heads which emerged from an unidentified flying object and went for a midnight stroll in Russia were aliens.

The scientists were called in after frightened folk in the city of Voronezh reported that on at least three occasions they had seen a large shining ball hover above a park in the city after dark and

then land. "A hatch opened and one, two or three creatures similar to humans, and a small robot, came out.

"The aliens were 12 to 13 feet high but had very small heads," the Tass news agency quoted witnesses as saying after one such visit. They didn't say if the creatures were friendly.

"They walked near the ball and then disappeared inside. Onlookers were overwhelmed with fear."
