# Alien-Landing Saga Continues but Scientist Disputes Tass Report

MOSCOW (AP) — A three-eyed alien with a robot sidekick landed by UFO and made a boy vanish by zapping him with a pistol, a Soviet newspaper reported Tuesday, in a second day of strange tales in the state-run media.

But as the bizarre saga of the space invasion of the city of Voronezh unfolded for a second day, a scientist whose words were used to buttress the first published report voiced doubts and said he was in part misquoted.

"Don't believe all you hear from Tass," Genrikh Silanov, head of the Voronezh Geophysical Laboratory, cautioned in a telephone interview from Voronezh. "We never gave them part of what they published."

Monday, the usually staid, official Soviet news agency told the world that scientists had confirmed an alien spaceship carrying giant people with tiny heads had touched down in Voronezh, a city of more than 800,000 people about 300 miles southeast of Moscow.

As many as three aliens 13 feet tall left the spacecraft, described as a large shining ball, and walked in the park with a small robot, Tass reported. A Tass duty officer stood by the story.

Monday's report spawned rumors in Moscow, including one that the aliens told Voronezh residents the Earth would be destroyed by the year 2000 if people didn't stop polluting it.

Nonetheless, a Communist Party paper, whose avowed mission is to write about culture was the only major national daily to print anything Tuesday about the UFO, indicating more authoritative newspapers such as Pravda thought the topic too hot to handle.

Sovetskaya Kultura said its coverage was motivated by "the golden rule of journalism: The reader must know everything."

"Of course, it's hard to believe in what happened in the town," it reported from Voronezh. "It's even more difficult to explain."

Scientists from a nationwide group that investigates "abnormal phenomena" were looking into the landing, the newspaper said.

Silanov, who said he belongs to the group, cast doubt on the Tass report that quoted him as saying the aliens left behind two rocks resembling sandstone of a deep red color that cannot be found anywhere.

"The rock they described as extraterrestrial is in fact a piece of iron oxide which could easily have originated on Earth," according to Silanov, 50.

He said there indeed was "a landing site" or something resembling one in Voronezh. But he ack-

## THE LATEST ACCOUNT

The Soviet daily Sovetskaya Kultura Tuesday quoted witnesses as saying a UFO flew into Voronezh Sept 27. At 6:30 p.m., it said, boys playing soccer saw a pink glow in the sky, then saw a deep red ball about 10 yards in diameter. The ball circled, vanished, then reappeared minutes later and hovered, it said.

A crowd rushed to the site, Sovetskaya Kultura said, and through an open hatch saw a "three-eyed alien" about 10 feet tall, clad in silvery overalls and bronze-colored boots, and wearing a disk on his chest.

The newspaper, quoting witnesses, gave this account:

The UFO landed. Two creatures, one apparently a robot, exited. A boy screamed with fear, but when the alien gazed at him, with eyes shining, he fell silent, unable to move. Onlookers screamed, and the UFO and the creatures disappeared.

About five minutes later, they reappeared. The alien had a "pistol" — a tube about 20 inches long, which it pointed at an unidentified 16-year-old boy, making him disappear. The alien went inside the sphere, which took off. At the same time, the boy reappeared.

"Children and eyewitnesses of the abnormal phenomenon have been questioned by police workers and journalists," wrote Sovetskaya Kultura's Voronezh correspondent, E. Efremov. "There are no discrepancies in the description of the sphere itself, or the actions of the 'aliens.' Moreover, all the children who became witnesses to this event are still afraid, even now."

It gave the names of only three witnesses, all youngsters.

— The Associated Press

nowledged that could happen as well if there were an underground pipe or cable, or an underground reservoir.

Silanov also said the testimony of children between the ages of 11 and 14 who claimed they witnessed the landing did not always correspond on how the aliens looked, and that they "certainly didn't mention the tremendous height" cited by Tass.

The phone connection was abruptly cut off before Silanov could answer more questions.
