UFO mania invades Siberia

United Press International

MOSCOW — Only days after pinheads from space landed in the Soviet Union, another giant unidentified flying object invisible to radar and with four giant headlights was observed in Siberia by hundreds of people, including a Red army major, a newspaper said Saturday.

Major Vladimir Loginov told Socialist Industry newspaper that the giant UFO later sped away at more than 4,300 miles an hour after hovering over the western Siberian city of Omsk last Tuesday.

The newspaper published its account 12 days after the official Tass news agency sparked a worldwide UFO craze by reporting

that 13-foot-tall aliens with tiny heads had landed several times in the Russian city of Voronezh and had taken nighttime strolls through a park.
