

✓ THY'nin 24 yıllık tecrübeli pilotu Selahattin Sivri, "10 bin metre yükseklikte uçuyorduk. Birden yanımdaki iki arkadaşımınla birlikte sol tarafta, kırmızı, mavi yeşil, keskin beyaz renkli ışıklar saçan ve bir apartman büyüklüğünde yumurta şeklinde dev cisim gördük" dedi.

"Dehşet içinde kaldım"

"Gördüklerimiz inanılmaz gibi değildi ama gerçektir" diyen Kaptan Pilot Selahattin Sivri iki arkadaşıyla büyük heyecan yaşamışlardı. 15 dakika birlikte uçtukları cisim görüntülemek o gerginlikte akıllarına gelmemişti.

- Kaptan pilot şöyle konuştu: "Işık kümesini ikinci kaptan pilot Hüseyin Kargı ile Uçuş Mühendisi Pertev Arkan da görmüştü. Üçümüzde şaşkınlık içindeydik. Bizden 2 bin metre kadar uzaklıkta uçuyordu. İzledikçe merakımız artıyordu."
- "Cismin uçtuğu doğrultuda bir uçak trafiği olmadığını, İstanbul'dan öğrendik. Dev yumurta, harika ışıklar saçarak sürekli dönüyordu. Nefesimiz kesilmişti. 15 dakika önümüzde uçtukten sonra aniden yükselerek kayboldu."

Left picture shows Mr. Selahattin Sivri, a pilot of THY (Turkish Air Lines) with 24 years and 10,000 hours of flight experience.

Right picture shows the pilot at interview with Mr. Faik Kaptan, a journalist of HÜRRIYET, a daily Turkish news paper.

Kaptan pilot, Hürriyet muhabiriyle

Selahattin Sivri gördüklerini hem THY yetkililerine hem de Kandilli Rasathanesi'ndeki görevlilere duyurdu. Onlardan aldığı bilgilere göre gördükleri cismin uçandaire olabileceğine daha çok inandı. Sivri bu olayı dakikası dakikasına arkadaşımız Faik Kaptan'a anlattı.

Captain pilot Mr. Selahattin Sivri and co-pilots Mr. Hüseyin Kargı and Mr. Pertev Arıkan sighted a UFO during a Zurich- Antalya (Turkey) flight. Mr. Selahattin Sivri explained this experience as follows.

" We took off with a Boeing 727 from Zurich airport at 23.00 o'clock at 25 October 1989. The weather was very clear and we ~~were~~ flying at ^{ac} 33.000 feet ^{altitude} at 800 kilometers speed per hour. When we arrived to Topolo, near Belgrad, Yugoslavia at 00.30 o'clock, a luminous object suddenly appeared at 2.000 kilometers away from us. It was at left and above of us at first but the object passed us within ten minutes. Now we were able to see it clearly. It was egg shaped and bigger ~~two~~ or three times than a commercial airplane. Its speed was same as our plane so we continued to watch it. When we arrived to Bulgarian air border, the colours on the object suddenly turned to three colour, red, green and very bright white. It was rotating while moving and colours were dancing in the sky. Colours were becoming intense by turn. It was very amazing and during my 10.000 hours of flight with military or commercial planes, I never saw such a thing. My co-pilots are also witnessed the same object. At Radovent, Bulgaria we contacted with control tower of Atatürk Airport, İstanbul but they could not trace this object on their radar screen. They told me that ~~there~~ was a plane from Yugoslavia airlines coming from the opposite direction and 2.000 feet below our plane, so we contacted with this plane and they confirmed sighting of this object. The object travelled in front of us nearly fifteen minutes and started to ascend slowly to 44.000 feet while it was 30 or 35 degree over the horizon. While ascending, its colour turned to white and while it was a very bright white ball it went up in the sky at a great speed and disappeared.

Mr. Selahattin Sivri, 45, was invited to a television programme and repeated his experience again.
