# I did — I saw a UFO

I SAW a UFO in broad daylight at 7.50am on Saturday. I was driving down Torquay's Teignmouth Road at Maidencombe Hill when an intense glow appeared through the trees from the sea.

At the bottom I was confronted by an object hovering about 200ft above the water, 50 yards from the beach. The surface was calm and there were no ships.

I got out of my car and stood in the road intending to flag down the next motorist as a witness. It was like a B

sci-fi film, nobody came.

After three or four minutes I hurriedly drove a quarter of a mile inland to the farm house opposite my cottage. I asked the farmer's wife to look out of her top window but the building was too low. Her husband bringing in the cows, shook his head.

ten minutes later I was in the office. The sky at Maidencombe had been empty when I re-passed. I told the news editor that when people reported the UFO to believe them because I had seen it, too.

It was cylindrical shaped like a huge florescent tube, possibly 100 or more ft across. Its pulsating red colour was more vivid than anything I have ever seen. It was incredibly bright.

The sighting has yet to be corroborated. I cannot believe there was nobody about in Maidencombe at the time. If anybody else was watching please could they let me know.

It was there — I saw it.
