

The facts are needed, not reports

Sir,—G. Cunningham does not appear to know the difference between a report and a fact. Permit me to elucidate the problem for him.

If it is said, "On the subject of UFOs Norman Barrie doesn't know what he is talking about" that is a report, which might or might not be true.

If I say, "The Battle of Hastings took place in 1066" that is a fact about which there can be no dispute.

Therefore, when G. Cunningham tells me that there have been reports about traffic becoming immobile while UFOs hovered overhead he is not providing the documented evidence I require that would convince me that UFOs exist. ✓

Patrick Moore, in his book "Countdown" tells of a George Adamski, who claimed to have been in UFOs several times, and to have conversed with Venusians, Martians and Saturnians. Needless to say they all looked like us and spoke broken English.

In "Intelligent Life in the Universe" Dr Carl Sagan, a world-renowned "scoffer", describes the adventures of a Nebraskan who was told by Saturnians that they had saved the Earth by altering its axis, which had a dangerous tilt!

Mr Cunningham refers to the Bible as providing proof that celestial beings exist. No, once again we have a report, not documented evidence beyond dispute.

Norman Barrie.
